

# McLeod Farms Peach Varieties

Fresh peaches are just about the perfect food - they are low in calories, high in fiber & Vitamin A, and are also sodium free.

**Cling** peaches are so named because the fruit “clings” to the stone on these firmer peaches. With **Semi-Freestone** peaches, the fruit pulls away from the stone when the peach is ripe. The fruit of the peach easily pulls away from the stone on our **Freestone** peaches, our most popular variety for canning & freezing.

Variety	Available	Type
